

Web Development Club: Week 06

Work Week – Review and Feedback

Last Week Recap

Introduction to Web Design:

- Have a goal for each page of your website
 - First have an idea about what your page will accomplish: what will you display? What will you write about?
 - Then figure out what you'll need to do these tasks: will you need images? In what places on the site do you want to put them?
 - Do you need headings? Background images?
 - Take inspiration from other websites you find
 - How can you implement these with HTML and CSS?
- Be sure to make use of the HTML and CSS reference sheets in the **Resources** page of the website

Table of Contents

Lesson 5 Recap

Reviewing Web Design
Tips

Feedback

Time for feedback and
revision before we move
to more in depth topics

Work Week

This is the week to work
on everything about
your site more in depth

Review & Practice

Ask about things you
want to review!

Feedback

So far, we've gone over the basics of how to use github to make a website, syntax and definitions, HTML elements, attributes, CSS properties, and how to approach web design

- Starting next week we'll be going more in depth into the coding for web development and before we start I wanted to get some feedback on how everyone is doing
- How is your website going?
- Are the lessons each week helpful? Is there any way I can improve them?
- Is there anything we've learned that you'd like a review on?
- How can I help?

Work Week on Individual Sites

Now is your chance to work on your site!

- Please do not hesitate to ask questions about how to code something or why your code isn't working
- I would like to know what specific types of things we want to do so I can write examples that are similar to what you want

If you don't know where to start:

- Modify your body css: apply a background image or a background color, adjust the font size or color, etc
 - `background-image: url("https://website.com/image.jpg")`
 - Make a header, include the name of your site or some navigation links to subpages
 - Draw it on paper
- 

Review and Practice

I encourage you to practice at home too, have a great break and see you next week!
